important person in our company

WHY CHOOSE US

✓ **Extended lifetime transferable product warranty**

At New Look Windows & Doors, we believe in the quality of our products and services, which is why we offer an extended lifetime transferable product warranty. This means that our warranty will cover your windows and doors for as long as you own your home, and it can be transferred to the new owner if you decide to sell.

✓ **Top energy-efficient technology**

We use energy advantage low-e glass in all of our windows and doors, which helps to reflect heat in the summer and retain it in the winter, resulting in a more comfortable home and significant energy savings. Our products are also designed with superior insulation, weather-stripping, and air sealing to prevent heat loss and air leaks.

✓ **Best of Homestars award winner 7 times**

Our customers have consistently rated us as one of the best window and door companies in the greater Toronto area, earning us the prestigious best of homestars award five times.

✓ **Professional and licensed installation crews**

Our installation crews are trained, experienced, and licensed, ensuring that your windows and doors are installed correctly and to your satisfaction.

✓ **Quality, quick and friendly customer service**

We pride ourselves on providing exceptional customer service from the moment you contact us to the completion of your project.

✓ **Superior design and materials**

Upgrade your home with superior design and materials. Energy-efficient and backed by a lifetime warranty. Direct from our factory.

✓ **Factory direct premium product line**

New look windows & doors is proud to offer a premium product line that is available to you directly from our factory. This means that you get the highest-quality windows and doors at unbeatable prices, with no middleman markup.

✓ **Honest and fair prices**

We offer honest and fair prices for our products and services, without any hidden fees or charges.

✓ **Senior discount**

We offer a senior discount to help older adults improve their homes without breaking the bank.

✓ **Referral bonus program**

We appreciate your referrals and offer a referral bonuses program to thank you for recommending us to your friends and family.

A CLOSER LOOK AT VINYL CONSTRUCTION

New Look Windows boast the highest number of internal air chambers, providing exceptional insulation, soundproofing, thermal efficiency, and increased durability.

Vinyl-Pro Windows are made from an exclusive, 100% lead-free uPVC powder compound. This special compound provides our window systems with a better resistance to impact and discoloration. It ensures that they will not crack, blister or warp, while remaining maintenance free.

These windows have the highest number of internal air chambers, giving them outstanding insulation and sound abatement qualities, as well as thermal efficiency and increased sturdiness.

A choice of maintenance-free PVC jamb extensions, frame moldings, and corn blocks are available to enhance inside finishing.

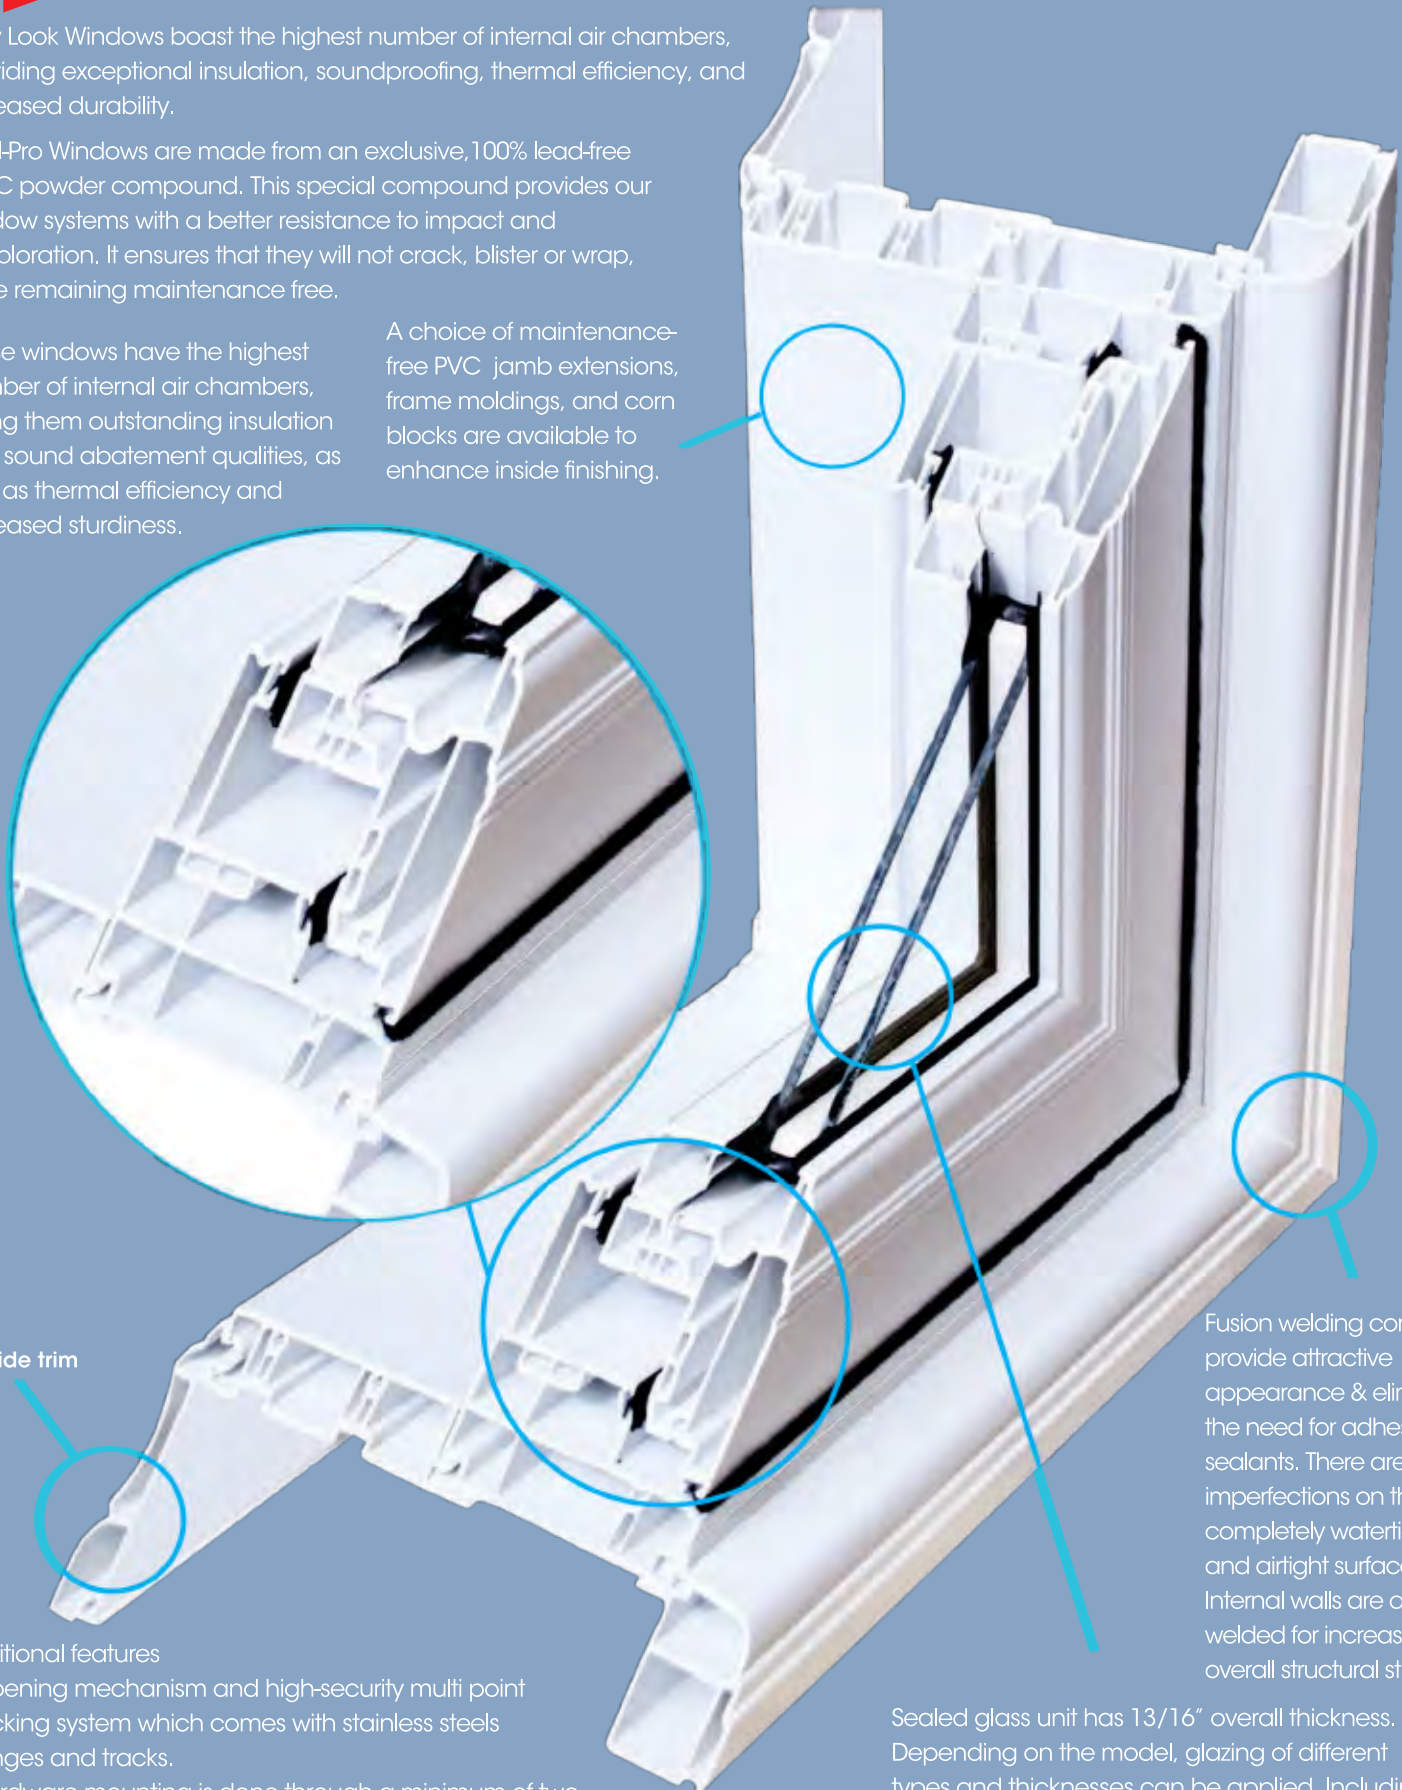

Inside trim

Additional features

- Opening mechanism and high-security multi point locking system which comes with stainless steel hinges and tracks.
- Hardware mounting is done through a minimum of two uPVC frame walls for secure and durable fastening.
- Depending on the model, casements open at a full 90°.

Sealed glass unit has 13/16" overall thickness. Depending on the model, glazing of different types and thicknesses can be applied. Including single, double, triple, and low-e glazing as well as a glazed decorative panel (3/4" to 1-1/8")

Fusion welding corners provide attractive appearance & eliminate the need for adhesive and sealants. There are no imperfections on the completely watertight and airtight surface. Internal walls are also welded for increased overall structural strength.

FIXED CASEMENT WINDOW

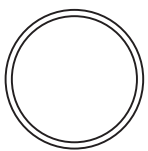

Our fixed casement window is specifically designed to complement our operating casement windows. The fixed casement, also known as a high-profile window, is contoured in the same way as an operating casement, resulting in identical frame sizes that give a cohesive and aesthetically pleasing appearance to your space, even without all windows being operational.

SLIM FIXED

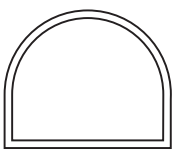

Our slim fixed windows are an excellent match for a slimmer slider and hung frames. When combined with these windows, they provide balance and symmetry throughout your home. The slim fixed, also known as a picture window, is an ideal choice if you want to maximize natural light or take in a stunning view.

ARCHITECTURAL SHAPES

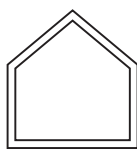

Circle Top

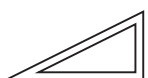

Equal Leg Arch

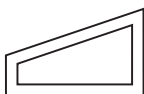

Cathedral

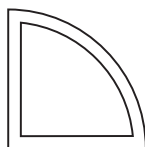

Peak Pentagon

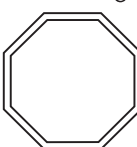

Right Triangle

Trapezoid

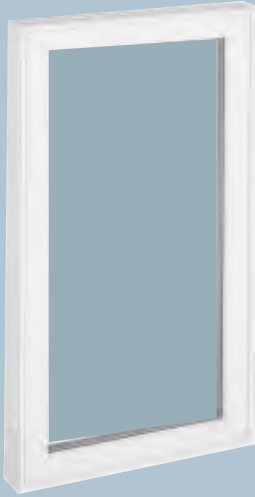

Quarter Circle

Octagon

Our uPVC vinyl technology is 100% lead-free and environmentally safe, providing you with the freedom to explore new heights in window engineering. With our innovative template design, we can turn non-standard polygons into full circles, egg shapes into hexagons, and create angles or curves that were previously unattainable. At new look, we push the boundaries of window design to offer you a comfortable, customizable solution for any space.

CASEMENT WINDOW

New Look's casement window is one of the most efficient and visually appealing operating windows available on the market today. Its extruded and bulb seals, combined with roto hardware, enhance the window's efficiency and performance. With its low-maintenance design, this window seldom requires servicing, ensuring long-lasting functionality and aesthetic appeal.

Features

- Fusion welded frames and sashes
- Bulb seals and extruded seals creating a triple weather sealing system, resulting in more energy efficiency and maximum resistance to air-infiltration
- Low e argon annealed glass units for thermal efficiency allowing you to stay warmer in the winter and cooler in the summer
- Design accommodating glass options
- Roto window operators and locks offering beauty, ease of use, security, and durability
- Multi point locks ensuring compression of weather stripping for superior performance
- Lock and load screen system to simplify screen removal for cleaning, thereby eliminating the pin and lock tabs

AWNING WINDOW

Our awning windows share the same simple and contemporary designs as our casement windows, but with the added benefit of practicality. These windows feature a swing-out design and the industry's most reliable and subtle operating mechanism, providing protection from rain while allowing for ventilation. Installing an awning window above doors or other windows is an excellent choice that allows abundant natural light and additional air flow into your space. Not only are they aesthetically pleasing, but they also provide functionality that adds value to any home or building.

Features

- Fusion welded frames and sashes
- Bulb seals and extruded seals creating a triple weather sealing system resulting in more energy efficiency and maximum resistance to air-infiltration
- Low e argon annealed glass units for thermal efficiency making you stay warmer in winter and cooler in summer
- Design accommodating glass options
- Roto window operators and locks offering beauty, ease of use, security and durability
- Multi point locks ensuring compression of weather stripping for superior performance
- Lock and load screen system to simplify screen removal for cleaning hereby eliminating the pin and lock tabs

SINGLE SLIDER TILT WINDOW

Our single slider tilt windows are a popular choice due to their swing-in sash mechanism, which features dual tabs that allow for easy exterior glass cleaning. Unlike double slider tilt windows, they offer a sleek and simple design that maximizes the surface area and minimizes screen obstruction. Thanks to its practicality and style, the single slider tilt window is a preferred option for homeowners.

Features

- Energy efficient low e argon glass units
- Standard removal screen
- Modern contoured frame
- Color matched cam locks
- Triple weather seals
- Low profile tilt latches
- Fusion welded sashes and frames

SINGLE HUNG TILT WINDOW

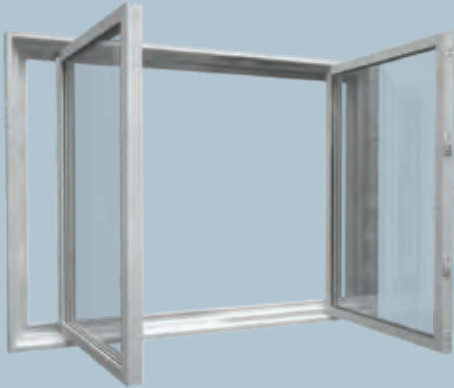

Our single hung tilt windows are an excellent choice for those who value traditional, double hung aesthetics with added security and energy efficiency benefits. With an operating sash that features a swing-in shoe mechanism and dual tabs, cleaning these windows is a breeze. The single hung window's unique design is often preferred for the front of the house, as it features a screen only on the bottom half, providing a stylish look and clear views.

Features

- Energy efficient low e argon glass units
- Standard removal screen
- Modern contoured frame
- Color matched cam locks
- Triple weather seals
- Low profile tilt latches
- Fusion welded sashes and frames
- Modern spiral balancers simplifying raising and lowering of sashes

DOUBLE SLIDER TILT WINDOW

Our double slider tilt window is the most popular window style we offer, thanks to its versatility and compatibility with various egress applications and architectural designs. the window is practical and easy to operate, with both sashes sliding and tilting for optimal ventilation and effortless cleaning. It's perfect for both large and small spaces, making it an obvious choice for bedrooms. Its clever design allows both sashes to open inward, making it an ideal solution for rooms with limited space.

Features

- Energy efficient low e argon glass units
- Standard removal screen
- Modern contoured frame
- Color matched cam locks
- Triple weather seals
- Low profile tilt latches
- Fusion welded sashes and frames

www.buywindowstoronto.com

DOUBLE HUNG TILT WINDOW

Our double hung tilt windows combine elegance and functionality into a single product. With two sashes - one in the upper and one in the lower part - our windows provide maximum flexibility in adjusting the window opening and airflow. You can easily slide the sashes past each other within the frame to achieve the perfect amount of ventilation. Additionally, our windows are designed for easy cleaning. The sashes are flexible, making it easy to reach all corners for quick and effortless cleaning. The windows also come with a removable, full screen that keeps bugs out while letting fresh air in. And when it's time for a deeper clean, you can easily remove the screen from the inside for thorough exterior cleaning.

Features

- Energy efficient low e argon glass units
- Standard removal screen
- Modern contoured frame
- Color matched cam locks
- Triple weather seals
- Low profile tilt latches
- Fusion welded sashes and frames
- Modern spiral balancers simplifying raising and lowering of sashes

CARDINAL ARCHITECTURAL GLASS

LoE 180 – Passive solar control glass

Windows provide natural light and beautiful views, but they can account for up to 50% of a home's heating and cooling energy consumption. Cardinal LoE 180 helps keep your home warm and cozy by blocking heat loss in winter, while also reducing summer solar gain by 10% compared to clear double-pane glass. Its low u-factor also blocks heat gain from outside, making it an energy-saving solution year-round. The insulating capability of cardinal LoE 180 is particularly beneficial for cold climates, improving indoor comfort and allowing for proper humidity control, which promotes a healthier living environment.

LoE 272 – Glass for all climates

Cardinal's LoE² coated glass provides year-round comfort by rejecting the sun's heat and UV rays in the summer, and reflecting heat back into the room in the winter. choosing windows that provide high levels of comfort and energy savings year-round is essential, and selecting the right glass is crucial. Trust LoE² glass to go beyond ordinary Low- \tilde{E} glass and handle any weather conditions.

LoE 366 – Ultimate glass for all climates

Get year-round comfort and energy savings with LoE³-366 glass. It strikes the perfect balance between solar control and high visibility, making it the go-to choice for energy star compliance in all zones. Unlike ordinary glass or tinted glass that can't handle the heat or spoil the view, LoE³-366 is specially formulated to keep your home cool and comfortable while letting in more light. It also blocks 95% of uv rays, protecting your furniture, carpets, curtains, and wall coverings from fading. Choose cardinal architectural glass for the best window option.

LoE i89 – Enhanced winter performance glass

Our double-pane windows now have triple-pane performance with the addition of LoE i89 coating on the indoor pane, which reflects escaping heat back into the room and lowers u-factors. When combined with our LoE² or LoE³ glass and argon fill, our double-pane windows deliver better performance than clear triple-pane windows with a center of glass u-factor of just 0.20 compared to 0.37 with clear triple-pane. LoE i89 also has a smooth and scratch-resistant surface, making it easy to clean, and allowing it to reflect internal heat back into the room for added comfort.

Super Spacer® COMPARISON

Comparing Super Spacer® and XL Edge™

NO-Metal Super Spacer®

Patented all-foam design dramatically reduces condensation, delivering the clearest picture in Warm Edge technology.

Windows made with Cardinal XL Edge™

Mid-performance spacer systems that still contain metal do little to improve condensation resistance.

- "Super Spacer is the world's leading 100% polymer foam, NO-Metal Spacing System."
- Super Spacer is 950 times less conductive than aluminum spacers, 85 times less than stainless steel.
- Windows with Super Spacer result in improved energy savings and improved window performance.
- Windows with Super Spacer have dramatically more condensation resistance than windows with XL Edge.

Super Spacer® Comparison Up to 70% better.

As much as +18.5°F warmer temperature at the edge of the glass.

Inside temp. 70°F
Outside temp. 0°F.

Super Spacer® is a registered trademark of Quanex Building Products. XL Edge™ is a trademark of Cardinal Glass.

Simulations performed by Enermodal Engineering Ltd. using Window 5.2 and Therm 5.2 as per NFRC100-2001. Outside temperature 0°F, inside temperature 70°F. Low-e glass Cardinal Low-e² 272. Air spaces .500" wide, 90% argon fill. IGU's 24" x 48". The secondary butyl used with Intercept® was 0.035" thick. [EIG906W/EB 11-08/EIG10009W]

43.7°F/6.5°C

Super Spacer® sealed with butyl.

34.8°F/1.6°C

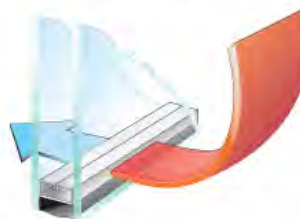

Cardinal XL Edge™

The Lowest Conductivity & IG U-factor

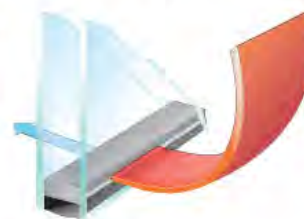

Block heat from escaping through the glass edge

The all-foam formula of Super Spacer® is proven to be less conductive providing optimal thermal performance and the lowest U-Value in the industry. Reducing conductivity also reduces condensation.

Metal Spacer

Super Spacer®

Spacer System	Condensation Resistance	Edge of Glass Temperature	Effective Thermal Conductivity	Total IGU Factor
Super Spacer® Structural Foam / butyl	44.9	43.7°F / 6.5°C	0.171 W/m·K	0.277
Cardinal XL Edge™	32.2	34.8°F / 1.56°C	0.459 W/m·K	0.293

Simulations performed by Enermodal Engineering Ltd. using Window 5.2 and Therm 5.2 as per NFRC100-2001. Outside temperature 0°F, inside temperature 70°F. Low-E glass is Cardinal Low-e² 272. All air spaces are .500" wide, IGUs are 24" x 48". [Test Reports EIG906W, EIG10005, EIG10009W]

STEEL AND FIBERGLASS DOORS

Steel doors

The New Look Elegance steel door collection seamlessly combines classic door features with the durability of steel.

The lock area is reinforced with a lock block for added protection, and the bottom rails are made with high-quality composite material that resists rotting. The door's smooth, galvanized white surface requires no additional finishing, but it can be painted to match the exterior and interior walls of your home if desired. For those seeking an extra touch of elegance, decorative glass inserts are available as an option.

www.buywindowstoronto.com

Fiberglass doors

If you're looking for a low-maintenance door that mimics the look and feel of a traditional wooden one, take a look at the fiberglass panel and side-lite models in our Entry Door Series collection. Our doors are available in a wide range of wooden patterns, including oak and mahogany grains. You can even choose a smooth surface that we can paint to match your desired color or pattern. Oak and mahogany grains can also be stained for a more realistic wood-like appearance.

www.buywindowstoronto.com

SLIDING DOORS

Our door collection is available in two-panel, three-panel, and four-panel units, but our automated manufacturing facilities make custom sizes a breeze.

Our uPVC doors are top-notch, offering superior protection and insulation to enhance the safety and comfort of your home. In fact, our Ultra Patio Doors are equipped with our Solar Solutions glass features upon request, which improves energy efficiency and maximizes home security. Trust our collection to provide you with the quality, style, and customization options you're looking for in a door. Compared to other manufacturers, our standard blind program offers a wider range of sizes.

Standard features

- Oversized sash frames create an opulent luxurious look
- Soft touch fin weather strip coupled with precision tandem rollers
- Special multi-finned weather strip at both top and bottom interlock position effectively reduce air infiltration
- Twin point lock and kick lock as a standard
- Superior 2" x 1/2" screen with fiberglass mesh, adjustable steel rollers, lock with pull handles and heavy duty zinc keeper
- Hi-efficiency glass packages for energy savings and general home comfort

OUR MISSION

At New Look Windows & Doors, we have been proudly serving the greater Toronto area for over two decades. Our mission is to provide our customers with the highest quality products and services at affordable prices, with a focus on dependability and trustworthiness. We believe that every professional relationship should be approached with care and attention, and we are committed to ensuring that our customers receive exceptional service from start to finish. As a result, we have earned a highly positive reputation in the window and door industry.

When you choose our products, you can be confident that you are selecting efficient, attractive solutions that will lower your utility bills and increase the value of your home. We only offer energy advantage low e glass, which can help you save up to 30% on your energy bills each year. And, no matter the season, you'll enjoy greater comfort thanks to our high-quality windows and doors.

We stand behind the quality of our products and services, which is why we offer lifetime warranties that are transferable to the new owners if you sell your property. We are so confident that you will be satisfied with your purchase that we offer a satisfaction guarantee – if anything falls short of your expectations, we will replace or fix it for you. Choose new look windows & doors for exceptional products, reliable service, and affordable prices.

WHAT YOU CAN EXPECT FROM US

At New Look Windows & Doors, we understand that selecting and installing new windows or doors can be a significant investment for homeowners. That's why we provide a high level of professionalism, expertise, and experience throughout the entire process to ensure your complete satisfaction.

Our process begins with your phone call and a no-obligation estimate appointment at your convenience. Our product specialists will come to your location, discuss your needs, and evaluate your project. They will provide samples, make recommendations, answer your questions, and guide you to the best options for your home and family. In many cases, we can provide a price quote on the spot, and we guarantee a complete project quote within 24 hours.

Once you've approved the contract and selected your products, our customer service team will schedule a convenient time for the work to commence. Our trained and knowledgeable installation team will arrive on time, perform their duties with the utmost respect for your home and property, and complete the job to your maximum satisfaction.

We firmly believe that your new windows and doors will impress your friends, family, and neighbors, and we greatly appreciate your referrals. To thank you, we offer a gift card once your referral project is completed. At New Look Windows & Doors, we are committed to 100% customer satisfaction with every project. We make the best recommendations for your unique home, keep you informed every step of the way, and perform our duties with skill and professionalism. We are confident that you will love your new windows and doors, and we strive to exceed your expectations.

MANUFACTURING FACILITY

Our vinyl windows are fusion welded with a 1/4" burn off to ensure durability and strength. We use digital precision 45° cuts to provide maximum strength during welding. Our cnc corner cleaning technology eliminates hand scratching of weld lips and provides the best automated finish in the industry. We also make our own sealed glass thermo units, ensuring prompt delivery and quality control.
